ADVANCED COATING  
SYSTEM FOR THE  
AUTOMOTIVE  
INDUSTRY**

# THE NEW FACE OF COATING SYSTEMS

TOPAZ is a clear, liquid nanotopaz coating, based on revolutionary technology developed by TOPAZ LTD. When cured, this technology will chemically bond, transforming itself on the surface to become a rigid, super-structure of nanoglass, protecting the substrate it is applied to indefinitely. Topaz was designed an industrial, multi-functional, protective coating for all surfaces. The nanoceramic glass coating forms an exceptionally strong and durable shield, resistant to solvents, acids alkalis, UV rays, harsh weather conditions and corrosion.

## WHY TOPAZ ON MY VEHICLE

### GOOD INVESTMENT

The coating will permanently protect the vehicle's exterior and interior from deteriorating. The resale market value of your car will be higher as not only will the coating have tangible benefits for the new owner but the warranty is transferable too.

**SELF-CLEANING**

**INTERIOR  
PROTECTION**

### LOOKING NEW ALL THE TIME

Once the coating is applied you will see ultimate gloss and color depth, incomparable to anything else, Properly maintained, the vehicle's finish will shine for many years to come.

### LESS MAINTENANCE

The slickness of the coated surface does not allow dirt, brake dust and tar to stick to your car's paint, wheels or glass. The coating is so slick and resistant to chemicals that contaminants can be removed with less aggressive and damaging wash methods. Washing the vehicle becomes less labor intensive and needed less frequently. Waxing is now obsolete.

**SUPER  
HYDROPHOBIC**

## HOW IS THIS POSSIBLE?

### PRESERVATION OF ORIGINAL FACTORY PAINT

Once cured, Topaz is measured to have a hardness above 9H. Normal clear coat has a hardness between 2H and 4H. The glass shield prevents minor scratches to your clear-coat and acts as a sacrificial layer. Any scratches to the coating are easily removed, without compromising the integrity of the original clear coat, with light polishing.

With TOPAZ the paint will not fade or age due to the UV and anti oxidization protection.

### GLOSSY, SLICK AND SELF-CLEANING

The complex nanotechnology used in the Topaz product range, allows the ceramic nanoparticles to fill the smallest pores in the paint making the coated surface shiny, smooth and extremely slick or hydrophobic.

Topaz dramatically lowers the surface tension preventing environmental contaminants such as bird droppings, bugs, dirt, tar and graffiti paint from bonding to the surface.

Water easily removes dirt from the surface by encapsulating it into water beads that rolls off the surface. This is called the self-cleaning effect.

### PERMANENT PROTECTION

Topaz 9H is a one-time application if maintained correctly. Once the Topaz glass shield has cured it can only be removed through abrasion like wet sanding. This puts Topaz in a category by itself, compared to sealants or waxes that degrade quickly with normal washing and can easily be stripped away with mild chemicals

PERMANENTLY PROTECTS THE VEHICLE'S PAINT & RIMS AFTER APPLICATION.

## A WINNING COMBINATION

### TOPAZ PPF + TOPAZ

Combining two of the most advanced surface protection products will result in an impressive cosmetic effect, improve the overall protection of the surface and make the installation process even easier.

Topaz can be installed on top of an existing Topaz coating.

### TOPAZ

#### SELF-HEALING

Topaz Self-healing is a film designed to feature the self-healing properties. This film is ideal to use on more exposed surface.

### TOPAZ

#### CERAMIC COATED

Topaz Ceramic Coated is a film designed to improve the visual appearance by adding gloss and hydrophobic effect to any surface it is installed on.

# STATE OF THE ART PPF TECHNOLOGY

TOPAZ is a highly advanced Paint Protection Film, designed and developed by internationally renowned Topaz manufactures TOPAZ LTD.

A high performance aliphatic polyurethane film, it is specially designed to protect painted surfaces from abrasion, corrosion, chemicals and other types of physical damage. In addition, it improves the overall visual appearance.

Many years of experience in the industry of surface protection and extensive research formulated a perfect PPF to be used along with Topaz coatings maximize the performance of our surface protection systems. It can be used in combination with Topaz protective coating or as a stand-alone product.

- HIGH GLOSS
- UV PROTECTION

- SELF-CLEANING
- INSTANT HEALING

- PREVENTS SCUFFS
- SUPER HYDROPHOBIC

## **PRESERVES** **THE VISUAL APPEAL**

Topaz PPF is manufactured using state of the art technologies and top quality raw materials. With impressive visual appearance, the film acts as a self-healing protective layer preventing the paint from being damaged by minor scratches and scuffs.

Being highly durable and self-healing. Topaz preserves the surface in its ultimate condition.

## **AREAS OF USAGE**

- Automotive industry
- Marine industry
- Public transportation
- City infrastructure
- **CHEMICAL RESISTANCE**
- **ECO FRIENDLY**
- **PREVENTS OXIDATION**
- **PREVENTS CORROSION**

# THE COMPANY

If you've ever dreamed of a top-class paint job for your vehicle, chances are that you've visualised a look that TOPAZ offers.

Topaz Detailing was created from the passion of cars and car presentation. It was born to rewrite how car owners should maintain the appearance of their vehicles.

## Why TOPAZ?

It's the protective coating brand capable of handling the intricate needs of even supercars, from enhancement, to protection through to maintenance. So handling regular cars, is definitely within our strong suit.

Our state of the art facility houses the environment & expertise of prime skill in detailing & paint protection film installation, competent with top professionals. Thus, the individual customization needs of every client, no matter how picky, are looked into with precision & clarity, to satiate any preference.

So the next time you're thinking of availing a premium car care solution package, think TOPAZ
