

Initiative is at the forefront of environment friendly, Sustainable and clean energy

SAVE MONEY, SAVE ENVIRONMENT:

Let us come together and reduce the carbon footprints and contribute towards sustainable development with solar energy by making it today's resource for a brighter tomorrow

— 01 —
EXCELLENCE
To us "Excellence" means standing out, aiming for supremacy in everything we do.

— 02 —
INTEGRITY
"Integrity" to us means reliability, honesty, being fair & faithful.

ABOUT US

Vaideep Ventures Private Limited is an emerging company in the solar energy industry headquartered in Sangli Maharashtra and Authorized Channel Partner & EPC Partner for Usha Shriram Solar and also is recognized by Govt. of India by the Department for Promotion of Industry and Internal Trade.

Here we offer you the finest quality affordable solar products with comprehensive EPC solutions (Engineering, Procurement, and Construction), cost-effective rooftop solutions, and project development also involved in O&M (Operations & Maintenance) we provide services with clientele spanning such as residential, commercial and agricultural sectors by providing smart project financing options with attractive interest rates coupled with the best customer support ensuring 100% benefits of the solar plant.

VISION

Sustainable development is the key policy for a bright future thus our vision is to contribute towards green energy and reducing carbon footprints for a sustained peaceful environment with constant development and advanced technology.

MISSION

Our mission is to approach clean and green energy to every home and commercial sector with constant growth through our presence by providing best-in-class services toward brighter tomorrow.

SERVICES WE OFFER

1. EPC Services

Vaideep Ventures Private Limited is an entirely forward-integrated and comprehensive EPC solutions provider for rooftops and ground mounting projects. We use the best of technology to design, install and commission the benchmark solar projects. The highly proficient and dedicated EPC teams at Vaideep assures the fulfillment of each solar PV system or plant from notion to commissioning including its procedure and support for the complete lifespan of the installed solar PV system.

2. Solar System Consultation:

When you get your solar consultation from Vaideep, we will personalize your solar system to match your solar goals. We will review your electric bill, calculate how much you will save with solar, and then design your new solar solution on the spot. This design includes a diagram of what your panels will look like on your roof. Once the design is set, our consultant will walk you through the different financial options if you need any to best fit your needs.

03
SANITY
We are devoted to caring for civilization and the environment throughout all our activities.

04
ENTREPRENEURSHIP
We passionately confronts the youth inspiring bold thinking, taking new initiatives, and exploring unique ideas.

3. Solar Operations & Maintenance:

As we have worked with the leading manufacturers of solar modules & equipment, with more than 2 years of experience in operating solar power stations, and with an experience from the leading manufacturing companies in this segment, we look after our customers' assets as if they are our own – meticulously caring for the useful life of these assets, maximizing their profitability, streamlining their performance and availability, and minimizing their consumption and operating costs.

OUR PROCESS

SUSTAINABILITY AT VAIDEEP
