ABOUT US

- Fineotex is an **ISO certified Public Listed Company with GOTS 6.0, Ecopassport, Green Screen Certified products**. We are listed in the stock exchange (**Bombay Stock Exchange & National Stock Exchange**) Fineotex has been recognized as a **'Star Export House'** with a market capital of **USD 500 million (September 2022)**
- Fineotex products **104,000 MTS/year** in India and Malaysia covering the entire range of speciality textile chemical, **offering the concentrated verison** and also suppling to most of the well-know Multinational Companies worldwide. Our **GMP certified**, accredited by **Global Certification & Inspection Services UK Ltd** plants are situated in **Navi Mumbai and Selagor in Malaysia** and meet the global standards.
- Since 2011, we have had a technical collaboration with a well-know European founded specialty chemical manufacturing company, **Biotex**. The state-of art plant is located in Malyasia and is maintained as per global standards. Our European JV partner, **Biotex** is now a **proud System Partner of Bluesign**.
- **Fineotex-Biotex have entered into a joint venture agreement with HealthGuard[®] Australia** and will synergize to bring the **most durable Anti-microbial & Anti-Viral metal free (no silver, no copper), Anti-Insect sustainable Chemistry**. Fineotex-Biotex will be the exclusive global marketing channel partner for the entire range of Helath Guard[®] products.
- **Fineotex** has entered into a strategic collaboration with **Euro-CTC**, Belgium, to commercialize specialty chemical for the India market. The **Eurody-CTC** gorup is a world- renowned European brand for specialized textile auxiliary manufacturer with footprints in 60 countries.
- **We are exporting to 69 countries around the globe**. Over a period of years, we have developed a soild reputation for quality and reliability and have 102 distributors in India, number of customers worldwide and also well-known corporates are our esteemed customers.
- Fineotex is proud and privileged to be recognised by Financial Times amongst TOP 500 Companies of Asia Pacific as a **"High-Growth Company Asia-Pacific 2020"**
- **Fineotex** is listed in the coterie of companies and be **India's Growth Champions 2020 by The Economic Times (India's Leading Financial Newspaper)**.
- **Fineotex** has been awarded the prestigious **'Business Excellence Awards 2022'** under the category **'SMS-Chemical & Pharmaceuticals'** by the **Dun & Bradstreet Coporation. November 2022**.
- **Fineotex** awarded the **"Hurun Industry Achievement Award 2022 -Textiles Chemistry "** by "Hurun Industry Achievement Award 2022"
- **Fineotex's Long Term & Short Term Credit Ratings** have been upgraded by **CRISIL** which is **A/Stable & A1 respectively. January 2023**.

OUR STRENGTHS

Strong balance sheet, Zero Debt, High ROCE & ROE, Consistent Dividend Paying.

Strong geographical footprints in 69 countries aecess the globe.
Low cost producer; competitive price positioning.

Access to best technological knowledge base through Biotex, Malaysia.

Strong Industry Knowledge -4 decades in speciality chemicals business.

(v) Thickeners	10
(vi) White Inks	10
(vii) Washing off Agent	10
(viii) Softener for pigment printing	10
(ix) Oxidising Agents	11

IV FINISHING

(i) Stiffeners	12
(ii) Softeners	12
(iii) Silicone Softeners	13
(iv) Wax Finishing Agents	14
(v) Antistatic Agent	14
(vi) Water Repellants and Soil Resisting Agents	14
(vii) Polyurethane Finishing Agent	15
(viii) Anticrease Resins	15
(ix) Anti-Pilling cum Antislip Agents	15
(x) Enzymatic Bio-polishing Agents	16
(xi) Yarn Lubricant	16
(xii) Other Finishing Auxiliary	16

I - PRETREATMENT CHEMICALS

(i) Desizing Agents

Finocon FBOL/POL	A highly efficient scouring & Desizing agent for 100% polyester and their Blends , with high alkali-stability, to produce soft feel when added to the weight reduction baths.
Finozyme ALFA Conc	An alpha-amylase based enzymatic desizing agent for cotton.
Finozyme ALFA 50	An alpha-amylase based economical enzymatic desizing agent for cotton

(ii) Wetting and Penetrating Agents

Finocon OTI	An anionic, rapid wetting and re-wetting agent.
Finocon OTP	An anionic rapid wetting and re-wetting agent in paste form.
Finocon AD80	A Concentrated anionic rapid wetting and re-wetting agent in liquid form.

(iii) Mercerising Agent

FINOCON MWVI	High Power, Concentrated, Low-foam, non-cresylic , alkali stable wetting agent, specially suitable for continous mercerization.
--------------	--

(iv) Sequestering Agents

Sequel 100 A	An excellent chelating agent , having acidic pH .
Diquet S	Excellent chelating agent having neutral pH .
Finoquest W	Concentrated sequesterant having acidic pH .

(v) Demineralising Agents

Diquest S	Sequesterant & demineralising agent with neutral pH.
Finoquest W	Concentrated sequesterant having acidic pH.
Finocon SEQ Powder	Concentrated Sequestering agent in powder form
Finocon IDU MAX / IDU NEW	Thermo stable sequesterant & demineralising Agent having acidic pH , specially suitable for removal of iron contamination .

(vi) Wetting agents cum Detergents

Finocon FBOL / POL	A highly efficient scouring agent for 100% polyester and their Blends with high alkali-stability, to produce soft feel when added to the weight reduction baths.
Finocon 10X / 21X	High power, low-foam, APEO free, wetting agent & detergent for both exhaust and continuous method.
Finocon WK Conc / RSPL 3	An economical, nonionic, APEO free wetting agent.
Finocon 4X / X55	A versatile scouring and stain remover on woven and hosiery fabrics.
Finocon L.D.Paste	A versatile detergent with wetting and dispersing properties in scouring of polyester, cotton and washing off raw wool .
Biotex NELA	All in one multifunctional product for pretreatment process reduces caustic dosage and process time .
Biotex LTB	Low temperature (75 - 80 C) wetting cum scouring agent retain fiber / yarn strength also saves peroxide & stabilizer.
Finocon PNF	Wetting cum deaerating agent specially for Denim.
Finocon LF56	An excellent high performance liquid scouring agent for wool / cotton & blends .

Finoscour LTX	A highly efficient pretreatment product, It is environment- friendly for not containing APEO . The product has the functions of scouring, emulsifying, penetrating, bleaching and dispersing .
Finocon K JET / K JET Conc	High performance, low-foam, APEO free, wetting agent & detergent for both exhaust and continuous method.
Finocon SM Conc	Concentrated High performance, low-foam, APEO free, wetting agent & detergent for both exhaust and continuous method.

(vii) Silicone Defoamers

Finofoam ND	A spot-free silicone-based defoamer .
-------------	--

(viii) Non-silicate Peroxide Stabilisers

Finostab SS	Organic Stabilizer for peroxide bleaching of cotton & its blends for exhaust process.
Finostab CBR	Organic Stabilizer for peroxide bleaching for continuous process .

(ix) Neutralizers

Finostab PK	Inorganic Peroxide neutralizer to remove residual peroxide.
Finozyme PKT	Economical enzymatic peroxide neutralizer.
Finostab HYPO	Sodium hypochlorite neutralizer .
Finocon Pinky / Antichlor 100	Potassium permanganate neutralizer in powder and liquid form.
Finozyme 300L / PK CAT	Enzyme based concentrated peroxide neutraliser

(x) Polyester Weight Reducing Catalyst

Finocon WRC High performance catalyst for **weight reduction** of polyester fabric.

(xi) Anti-back Staining Agents

Finocon MED An additive for **anti-back staining** in desizing and garment process in **powder form**.

Finocon ABSZWP 40 An additive for **anti-back staining** in desizing and garment process.

(xii) Core Alkali Neutralisers

Fineacid Premium An **acid buffer** having capability to **neutralize Core alkali** after mercerization of cotton as well as after weight reduction of polyester fabrics.

Finocon ECO Conc /
 ECO 100 / ECOX An **Acid buffer and core alkali neutralizer** after Mercerization of cotton and all type of fabric.

(xiii) Other Pretreatment Auxiliary

Diquet AP274 **Anti tinting agent** for reactive top dyed & printed fabrics.

II – DYEING CHEMICALS

(i) Sequestering Agents

Diquet S

Sequestering agent having **neutral pH**, specially suitable for cotton dyeing with Reactive & Vat Dyes

Finocon IDU NEW /
IDU MAX

Sequestering agent having **acidic pH**, specially suitable for polyester dyeing with Disperse Dyes at high temperature and very good **iron chelating power**.

(ii) Defoamer

Finofoam ND

A spot-free **silicone-based defoamer**.

(iii) Acid Buffers

Fineacid Premium /
Fineacid Super

A high performance **substitute for acetic acid and pH buffer** for polyester dyeing with **low BOD and COD**

Finocon ECO Conc /
Finocon ECO 100 / ECO X

An economical & **eco-friendly acetic acid substitute** for polyester dyeing.

Finocon GAA Premium

Non-volatile acid buffer for Polyester dyeing with Disperse dyes.

(iv) Polyester Dyeing Carrier

Finostrate EN70 / EN Eco

A **carrier for low temperature dyeing** of polyester with disperse dyes.

(v) Dispersing and Oligomer - Removing Agents

Finocon DON

A powerful dispersing agent for dyeing with disperse dyes stable to high temperature, high **electrolyte concentrations and oligomer remover**.

Finocon DISP

Dispersing agent for polyester dyeing with disperse dyes as well as cotton dyeing with Vat dyeing on continuous dyeing range (CDR)

(vi) Levelling Agents

Finosil DFT	Levelling agent for dyeing of polyester and their blends with disperse dyes.
Finocon DG New	Levelling & releveling agent for dyeing of polyester and their blends with disperse dyes.
Finocon SMK-U	Versatile levelling agent for dyeing of nylon & wool .
Finocon CLA 100S	Versatile levelling agent for dyeing acrylic fibres & fabric with cationic dyes.
Finosil RLA	Levelling agent for the dyeing for reactive dyes on cellulosic fiber and fabric.
Finosil PLA New	Dispersing & Leveling agent for Polyester Dyeing with no retarding effect.
Finocon DALP	Dispersing and leveling agent based on migration theory for polyester dyeing with no retarding effect

(vii) Anticrease Lubricants

Finolube FI / CC	An economical anticrease lubricant to prevent crease marks in cotton as well as polyester – preparation & dyeing stage of operation in rope form.
Finocon CAZ Premium	Anticrease lubricant having emulsification property to remove oils to avoid marks occurring due to fabric-fabric & fabric to metal friction.
Finolube PP	Concentrated anti crease lubricating agent in powder form .

(viii) Washing off Agents

Diquet SNA / SN / NS2	Polymeric compound with protective colloidal & sequestering property . They bind the impurities, prevent redeposition and improve fastness and give brilliancy on white goods.
-----------------------	---

Diquest AP 274	Efficient reactive washing off detergent with special reference to remove silicate from dyed fabrics and gums from printed fabrics .
Finowash RL	Reactive washing off agent in acid medium, thereby reducing one process of neutralization, leading to saving in utility costs and time.
Finocon RDP ECO / RDP	A powder form efficient dispersent (proactive colloid), chelating, washing off agent cum levelling agent.
Finocon SSWX	Highly effective single bath soaping agent for substrate dyed and printed with reactive dyes.
Finocon 6065 W	A special soaping agent for Reactive Dyes for dyeing & printing process highly effective at 60-70° C .
Biotex CT 22	A novel soaping agent for P/C Blends which eliminates the Reduction Clearing Process and is energy saving, cost saving and also reducing ETP load by 30%
(ix) <u>Dye-fixing Agents</u>	
Finofix PBCT / Finofix PBC Conc	A cationic formaldehyde base dye-fixing agent , with high molecular weight, for fixing of cellulose dyed/printed with direct and reactive.
FINOFIX	Fixing Agent to increase fastness in denims.
BIOCON CRO 100	Wet and dry rub fastness improving agent for all dyed and printed fabric.
Finofix NFE / 4231	Cationic Dye fixing agents with no formaldehyde content to improve wash-fastness of reactive dyed yarn/fabrics with minimal tone - change & effect on light fastness.
Finofix RD	A special non-formaldehyde fixing agent for direct and reactive dyes.
Finofix NFYT / NFY	A special non formaldehyde fixing agent for dyeing especially for the turquoise shade and bluer/greener tone, specially for prints.

(x) Soda Ash Substitute

Finocon ADA Premium	Highly effective soda ash substitute for fixation of all types of Reactive dyes on cellulose, reducing load on effluent treatment plant due to its lower TDS, BOD & COD.
Finocon ADAP 100	Highly effective 10 times concentrated soda ash substitute in powder form , for fixation of all types of Reactive & sulphur dyes on cellulose yarn, fibre & garments.
Finocon ADAP 5000 / Finocon ADXX Premium	Highly effective 4 times concentrated soda ash substitute in powder form , for fixation of all types of Reactive & sulphur dyes on cellulose yarn, fibre & garments.

(xi) Cationising Agent

Finocon CAW / CATZ	Highly effective Cationising Agent for Pigment Dyeing.
--------------------	---

(xii) Reduction Clearing Agents

Finotreat EC /100P	State - of - the art product, replacing both Caustic Soda & Sodium Hydro-Sulphite in Reduction Clearing. Enables to treat substrate after dyeing in acidic medium, thus saving neutralization step which leads to save time, water, steam, power & labour.
Biotex NAHY	Four times stronger sodium hydrosulphite substitutes in powder form .
Biotex NAS4 Conc	A powder form 100% eco-friendly reducing agent for clearing dyeings on polyester and their blends . Applied in the dyebath and most effective under acidic conditions.

(xiii) Other Dyeing Auxiliary

Finocon Oximagic	Oxidising agent for sulphur dyeing of cellulosic fabric.
Finocon RESA New	An economical efficient Resist salt substitute for printing and dyeing process.
Finostrip NS	Striping agent for reactive dyed fabric.
Finocon FAMK	An anti migrating agent for continuous dyeing.

III – PRINTING CHEMICALS

(i) Dispersing, Penetrating, Swelling, Levelling and Defoaming, Antifoaming agents

Finoprint KBI / FW New	Wetting, penetration and defroathing agent for pigment printing.
Finocon PD AC	Flow improver, levelling, penetrating & anti – chocking aid for printing paste which helps maintaining the water balance on printing screen, thus working as an anti-chocking agent.

(ii) Fixation Accelerator in Polyester Printing fixed on Loop Steamer

Finocon LACM SPL / LA88 SPL	A concentrated product to enhance colour depth in loop ager for disperse prints.
-----------------------------	---

(iii) Binders

Finobind AQBD	An acrylate based binder to impart high degree of fastness with good softness to pigment prints using aqueous acrylic thickeners.
Finobind OKO	A binder for excellent & sharp prints giving good wet rubbing fastness for pigment khadi prints.

(iv) Fixers in pigment printing

Finofix CL / CL365M	A melamine based fixer for pigment printing.
Finofix CLDU / CLDU-Y	Economical melamine based fixer for pigment printing.
Finofix CLZS	Highly concentrated melamine based fixer for printing pigment for excellent fastness.
Finofix NF	Fixer for pigment printing with no formaldehyde content .

(v) Thickeners

Finothick FSTR New	Synthetic thickener for reactive printing.
Finothick KER HV / IHC 17	Concentrated Acrylic thickener for aqueous pigment printing.
Bioprint RDT	Sodium alginate substitute in powder form
Finothick RDHT2A	A combination of natural and synthetic thickener for reactive printing in paste form.
Biocon DI	Pre coating auxiliary for Digital Printing
Finothick POLY	All in one product for disperse printing

(vi) White Inks

Finoprint LCK	An excellent PVC & Pthalate free water based synthetic white ink, stable to carbonising.
Finoprint STK / AQW	An excellent white ink to provide elasticity/stretch to knits.
Finoprint Stretch Clear	An excellent clear ink to provide elasticity/stretch knits.

(vii) Washing off Agent

Diquest AP274 / SNA / SN	Efficient reactive washing off detergent with special reference to remove silicate from dyed fabrics and gums from printed fabrics.
--------------------------	--

(viii) Softener for pigment printing

Finox RSN 305	A special softener for pigment printing imparting softness & avoid harsh feel.
---------------	---

(ix) Oxidising Agents

Finogal R

A mild oxidizing agent widely used as a safeguard against the reduction of dyes in alkaline print pastes and in closed dyeing systems where reduction condition may occur. It is also used in boiling /scouring of coloured – border piece goods.

Finocon Activator

An Activator for Discharge printing.

FCL

IV – FINISHING CHEMICALS

(i) Stiffeners

Finosol EM	Polyvinyl acetate emulsion -based product for giving body and stiffness to all types of fabrics.
Finosol MBX	Polyvinyl acetate emulsion with plasticizer for giving extra body, luster and bulkiness to heavier fabrics without a papery feel.

(ii) Softeners

Cationic Softeners

Finox CS flakes	An economical hot water soluble cationic softener for imparting extremely fluffy feel, along with good durability.
Finox CWS Flakes	Cold water soluble cationic softener in flakes form.
Finox TTRW	Hydrophilic Cationic softener for terry towels and knits to improve absorbency and impart a soft handle. It can be applied by exhaust or padding techniques.
Finox CSPL	Super hydrophilic 100% cationic softener , in liquid form.
Finox ROM	An economical cationic softener for fabric & garments.
Finox DM / Silsoft	An excellent modified cationic softener imparting smooth; fluffy and high surface softness, mainly for knits.
Maxsoft	Modified cationic softener to impart overall softness to yarn & fabrics with no change in tone of dyed fabrics.
Finox LFNY Premium	Specially developed, modified cationic softener with low-foam, non – yellowing tendency, suitable for whites & pastel shades.
Bioquat 90	A concentrated cationic fatty quat-glycol softener synthesized specially to impart excellent silkiness and fluffy softness, coupled with full handle to all woven, knits, garments, jeans, terry-towels with very low yellowing but little hydrophilic properties. It is effective for all fibre types and can be applied by exhaust & padding.

Finox IO

Cationic softener for **better wash fastness** suitable for all substrate.

Finox FRWF

Low –foaming specialty softener, which imparts a very supple, **soft feel and lubricity** to cellulotics & synthetics.

Amphoteric Softener

Finox SFC

A newly modified, **non - yellowing amphoteric softener** which produces excellent surface smoothness and lasting soft feel coupled with inner softness.

Non-ionic Softeners

Finox NIS Flakes

An economical **non-ionic Softener Flakes** with excellent softness & fluffy feel.

Finox NIS Ultra / NIF

Excellent **non-ionic softener** in paste form and imparts soft finish of garments and denim.

(iii) Silicone Softeners

Finox SIL Premium

A Concentrated micro amino silicone softener in liquid form to impart greater inner softness to all type of substrates.

Finox 3P

A Highly concentrated micro amino silicone softener in liquid form to impart greater inner softness to all type of substrates.

Finox 999 / Finox 60T

Economical **micro amino silicone softener** to impart greater softness to all type of fabric.

Finox XLH Extra

A hydrophilic micro amino silicone softener especially for knitted fabric, **terry towel** and also other substrate

Finosoft SPL

A special silicone softener imparting **peach** like finish in all types of substrates.

Finosoft

A macro amino silicone softener for bounciness and surface softness for all kinds of fabrics.

Finox M Bounce

A micro amino silicone to impart high degree of surface **wet feel & inner softness** to suiting & shirting.

Finox HY04 / HY02

A unique quat based hydrophilic silicone softener which imparts superior **unusual powerful softness** and hydrophilicity to the substrates especially towels.

Finox PVX / PVX AM 40 / PV404

High performance micro amino silicone softener imparting **inner as well as surface softness especially for suiting**.

Finox NNN 27 Premium

New generation micro silicone softener imparting **inner as well as surface softness especially for suiting**.

Finox B87

New generation micro amino silicone softener imparting **softness and drape especially for suiting**.

Finox Shine

A special softener for soft hand feel along with shine for denim, garments and other fabric.

(iv) Wax Finishing Agents

Finolube PEC ECO

Polyethylene wax emulsion softener with lubricant property and soft waxy finish which also helps to **minimize tear-strength loss during resin finishing**.

Finox WPAR

Paraffin wax emulsion softener, to impart lubricancy & shine to Cotton fabric.

Finox DH 1000

High density polyethylene emulsion to minimize tear strength and for bulk handle.

(v) Antistatic Agent

Finostat 20 / Conc /
Finolose TM 2803

A soil-release finish with antistatic property, to dissipate static charges and prevent shocks on the finishing trolleys.

(vi) Water Repellants and Soil Resisting Agents

Finoguard SI

A fluorocarbon chemical resin emulsion based on **C-8 chemistry** which can impart durable water and oil repellency to synthetic and natural fibers.

Finoguard EEE W

A fluorocarbon chemical resin emulsion based on **C-8 Chemistry** with extender which can impart durable water and oil repellency to synthetic and natural fibers.

Finoguard SIFX	A Concentrated fluorocarbon chemical resin emulsion based on C - 8 chemistry which can impart durable water and oil repellency to synthetic fibers and natural fibers.
Bioguard C6	A fluorocarbon chemical resin emulsion based on C-6 chemistry which can impart durable water and oil repellency to synthetic fibers and natural fibers.
Bioguard Zero	A non fluorocarbon based water repellent along with softness to all substrates
Bioguard SR	A Fluorocarbon chemical emulsion based on C6 chemistry with soil release for polyester.

(vii) Polyurethane Finishing Agent

Finox PU	Nonionic Polyurethane softener, providing excellent bouncing and surface softness, specially for suiting.
----------	--

(viii) Anticrease Resins

Finox DMDF VV / DMDF VZ / DMDFE	A DMDHEU based cross linking agent for wash-n wear anti crease finish without built-in catalyst.
Finox SKV	A low formaldehyde cross linking agent for wash - n - wear anticrease finish with built-in catalyst.
Finopret ZF	A Zero formaldehyde cross - linking agent for wash - n - wear anticrease finish, without built - in catalyst.
Finopret ZFR	A Zero formaldehyde cross - linking agent for wash - n - wear anti crease finish with built - in catalyst.

(ix) Anti-Pilling cum Antislip Agents

Finobind AQBD S	Excellent anti pilling agent for reduce pill formation and to avoid slippage.
Finox LEC 10	A Lycra Protector (Anti Breaking Agent) is special modified emulsion applied also for anti slipping finishing, for anti-pilling an to prevent shrinkage and breaking of spandex fiber.

(x) Enzymatic Bio-polishing Agents

Finozyme PML Conc/ AC	A specially designed enzyme for application in Biofinishing and Denim washing of all cellulosic fabrics, both woven and knits in acid medium.
Finozyme NEU Conc / EN Extra / NCR	A special neutral enzyme for Bio-polishing to impart superior surface smoothness to cellulosic fabrics as well to denim garments in neutral medium.
Finozyme EN Extra / 25000L Conc	Neutral cellulase biopolishing enzyme
Finozyme BIO SR 100	A powder form concentrated neutral cellulose enzyme product for bio- finishing.

(xi) Yarn Lubricant

Finox LUB / LUBDH	Specialty softener, based on special wax softener to impart high degree of lubricancy to yarns, to withstand yarn-yarn & yarn-metal friction to enable smooth working of yarns on subsequent machines to avoid breakage and increase efficiency.
-------------------	---

(xii) Other Finishing Auxiliary

Finolose TM 2803	A Specialty softener to impart softness, antistatic, wicking & Soil release finish.
Finox NIS Flakes	A novel Protective agent against ozone fading of denim with excellent soft handle.
Finobloom	Superior Colour enhancer for polyester & cotton dyed fabrics impart one step finish & imparting soft handle.
Finobloom Jet Black / SBI CO	Blooming agent for denim and developed to deepen the shade of Cotton fabrics.
Biocon CRO 100	Wet and dry rub fastness improving agent for all dyed and printed fabric.
Flamguard CP	Durable Flame retardant for cotton.
Finox UV 2000	Sun Protection factor improver.
Finox UVP	A highly efficient UV absorber to process polyester textile goods selected for the automotive industry.
HealthGuard BK	Anti-microbial and anti-odor finishing.

ECO FRIENDLY

We at FCL, believe in developing our processes & products in a manner such that no harm is caused to life and nature. We believe in being ecologically conscious and providing our customers with not only the best but also the most eco friendly products and we consider this as a serious social responsibility. All the effluents created during various processes are disposed off carefully without causing any harm to the surroundings. Thus, we are developing ourselves as an industry pertaining to ecological norms and developing the right kind of products for a better tomorrow.

BT BIOTEX Sdn BHD, is a proud bluesign® SYSTEM PARTNER

We are now

FCL FINEOTEX CHEMICAL LIMITED
