# Abrasives

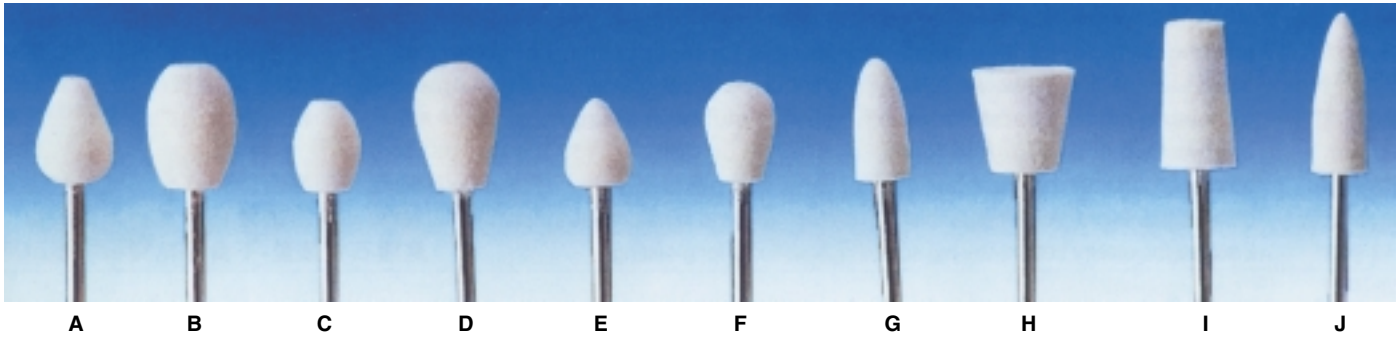

brown	black	green	greenish-blue	red	white	grey	blue
	brown	aluminum oxide, <b>long lasting</b> for pre-finishing all metals.					
	black	silicone carbide, <b>coarsest</b> for carving gold.					
	green	silicone carbide, <b>traditional industry favorite</b> for fast polishing of gold.					
	green-blue	silicone carbide, <b>hi-shine</b> for final polishing of precious, semi-precious and non-precious metal.					
	red	aluminum oxide, <b>coarse</b> for rapidly remove stubborn stains.					
	white	aluminum oxide, <b>ultra-fine</b> for highest polish on gold.					
	grey	silicone carbide, <b>hi-glaze</b> for instant touch up polishing.					
	blue	pumice rubberized, <b>very-fine</b> for final polishing of gold and semi-precious metals. Favorite for jewelry setters-will not scratch stone. Extra long-lasting.
