CARDIO SERIES

We at PowerMax Fitness are distributing some of world's best fitness equipment in India that are sold & serviced in more than hundred countries. From hi tech treadmills to ergonomic bikes & elliptical trainers our product range mirrors our dedication to provide products that stand alone in a crowded fitness market. Working with professional partners in USA, our product selection team continues to explore new standards in the world of fitness. The results is world class fitness equipment that looks, fees and performs like no other.

Never satisfied with the status quo, we continue to expand our product portfolio with a commitment to constantly developing more motivational and rejuvenating exercise experiences.

From the first-timer to the hardcore exercise, we know that all users have high expectations. So we spend significant time and resources asking them what they want and need. It's simply our way of letting the user know that we have their interests in mind every step of the way.

As a dominant supplier of cardio equipment, we know that your facility is more than what kind of machines you offer. It's really about the experience you provide. That's why we're fully committed to working with our customers in order to help them offer their clientele a truly rewarding fitness environment. Whether it's a commercial fitness center, a hotel or university gym, or the workout space in a multi-housing complex, our one-on-one approach and speedy service coverage guarantees we'll be there for you in every possible way.

STRENGTH SERIES

The Advantage of Strength Machine

All the strength equipments are made of premium imported steel with thickness 3 mm.

The cushion is one-time shaped with polyurethane craft to make it never be distorted or caved.

All the machines are equipped with the magnetic bolt to make the movement more scientific, comfortable and safer.

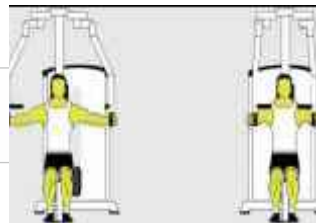

The accessory on the machine such as the plug which is one-time mould is designed to make the details perfect and enhance the overall artistic.

The steel wire used on the machine is 5.8 mm in diameter ,which is composed of 6 threads and each thread is made up of 9 wires to make it more durability and safer.

The seat is controlled by the pneumatic and embodies the humanization design to make the movement more comfortable, also there is a special design to strengthen the seat to improve the stability and safety.

The moving orbit is designed to be arc and conforms to the human body kinematics principle which will make the exercise more scientific comfortable and safer.

O SERIES

Ergonomics

Seat Back Pad : Apply the principle of ergonomic, the use of honeycomb foam technology a molding design, fit the human body curve, make the load of movement evenly distributed for users to bring a higher degree of comfort.

Handle : The use of soft TPV (thermoplastic vulcanized rubber) extrusion molding, the use of anti-sliding, increase comfort, the ergonomic design will disperse the load of movement of pull and push evenly.

Biomechanic

Seat Adjustment : The use of four-link mechanism and air spring automatic adjustment, so that more smooth adjustment, ease, and convenience.

Handle : The use of soft TPV (thermoplastic vulcanized rubber) extrusion molding, the use of anti-sliding, increase comfort, the ergonomic design will disperse the load of movement of pull and push evenly.

Push Arm: The use of the four-bar mechanism to enhance the stability of the movement, the movement resistance directly transmitted to the link, so that the movement trajectory is more smooth, more vividly sense of force

1. The main frame of the pipe is 137*40*3.0 flat oval
2. Backrest multi-position adjustment, suitable for the needs of different users, the handle with a soft PVC extrusion molding relative to the rubber extrusion more wear-resistant.
3. The use of high-strength aluminum alloy end cover, nice, durable, never fade.
4. Sitting cushion using a man-made principle of a molding design, fit the human body curve, comfortable and durable.
5. The movement trajectory to the heart and centrifugal trajectory, in line with the principles of human bio mechanics.

A word cloud consisting of the word "DUMBBELLS" repeated in various sizes, orientations, and colors. The word is most prominent in the center and bottom, where it appears in large, bold, red font. Smaller instances of the word are scattered throughout the image, some in white and some in a lighter shade, creating a dense, textured effect that fills the frame.
