

Hello !

Hope you are doing well. As per discussion with our representative , we are sharing a brief on our product - Uno Green Card.

Greetings from Uno Green!

One of the most significant advantages of digital business cards is that it is a convenient way to store as much information as you want in one place. Unlike the paper cards, there is no lack of space here. So, include your URLs, website addresses, social media accounts, fax number, phone number, and more in the card.

There happen to be an array of tangible benefits of using digital business cards ranging from saving money, to ones that increase the effectiveness and efficiency of carrying out business activities. If people would give this idea a real thought they would realise that the majority of things to gain by making the switch to digital business cards are the disadvantages of paper business cards.

About Uno Green Cards:

It's an NFC-enabled card with sharing your information with just a tap. A digital business/personal card.

For every card sold our company will contribute towards planting a sapling in collaboration with SankalpTaru foundation. A small initiative by us to make the earth greener by not using the traditional paper business cards and switching to Uno Green Digi card which is not only eco friendly but saves tons of rupees that we spent on printing paper cards.

We at Uno Green believe in making this an environment friendly initiative by collaborating with SankalpTaru Org.

We aim to make “leaving an impression” an easy task for all!

How could you benefit from this?

- An affordable way to promote your brand
- Fantastic for events and exhibitions
- Something tangible - the business equivalent of vinyl records
- Easy to distribute and display
- Perfect for all industries irrespective of the profiles
- Remembers all coordinates for you
- Leaves a lasting professional impression
- Pocket-sized to carry at all times
- Helps visually commit your brand to memory
- **IT'S STYLISH!**
