For KAVACA ION PPF, the package includes a Layer of ION Coat & Top Coat, one layer of Ceramic pro coating on all Exterior Glasses, Plastics & Alloys.

For Ceramic Coated PPF, the package includes one layer of Ceramic pro coating on all Exterior Glasses, Plastics & Alloys.

Ceramic Pro coating on leather and PPF on Interiors are optional

ABOUT CERAMIC PRO

Ceramic Pro and its manufacturer Nanoshine Ltd dynamically evolve the coating industry. It has worked on industrial multifunctional protective coatings for all surfaces and strives to keep improving. Ceramic Pro has worked for years in creating revolutionary ceramic coatings for many industrial segments. This has led Ceramic Pro to dominate the world market for nano-ceramic coatings in the automotive space. In 2019, with the launch of KAVACA Instant-Healing Paint Protection Film, Ceramic Pro again reinforces its commitment to innovate.

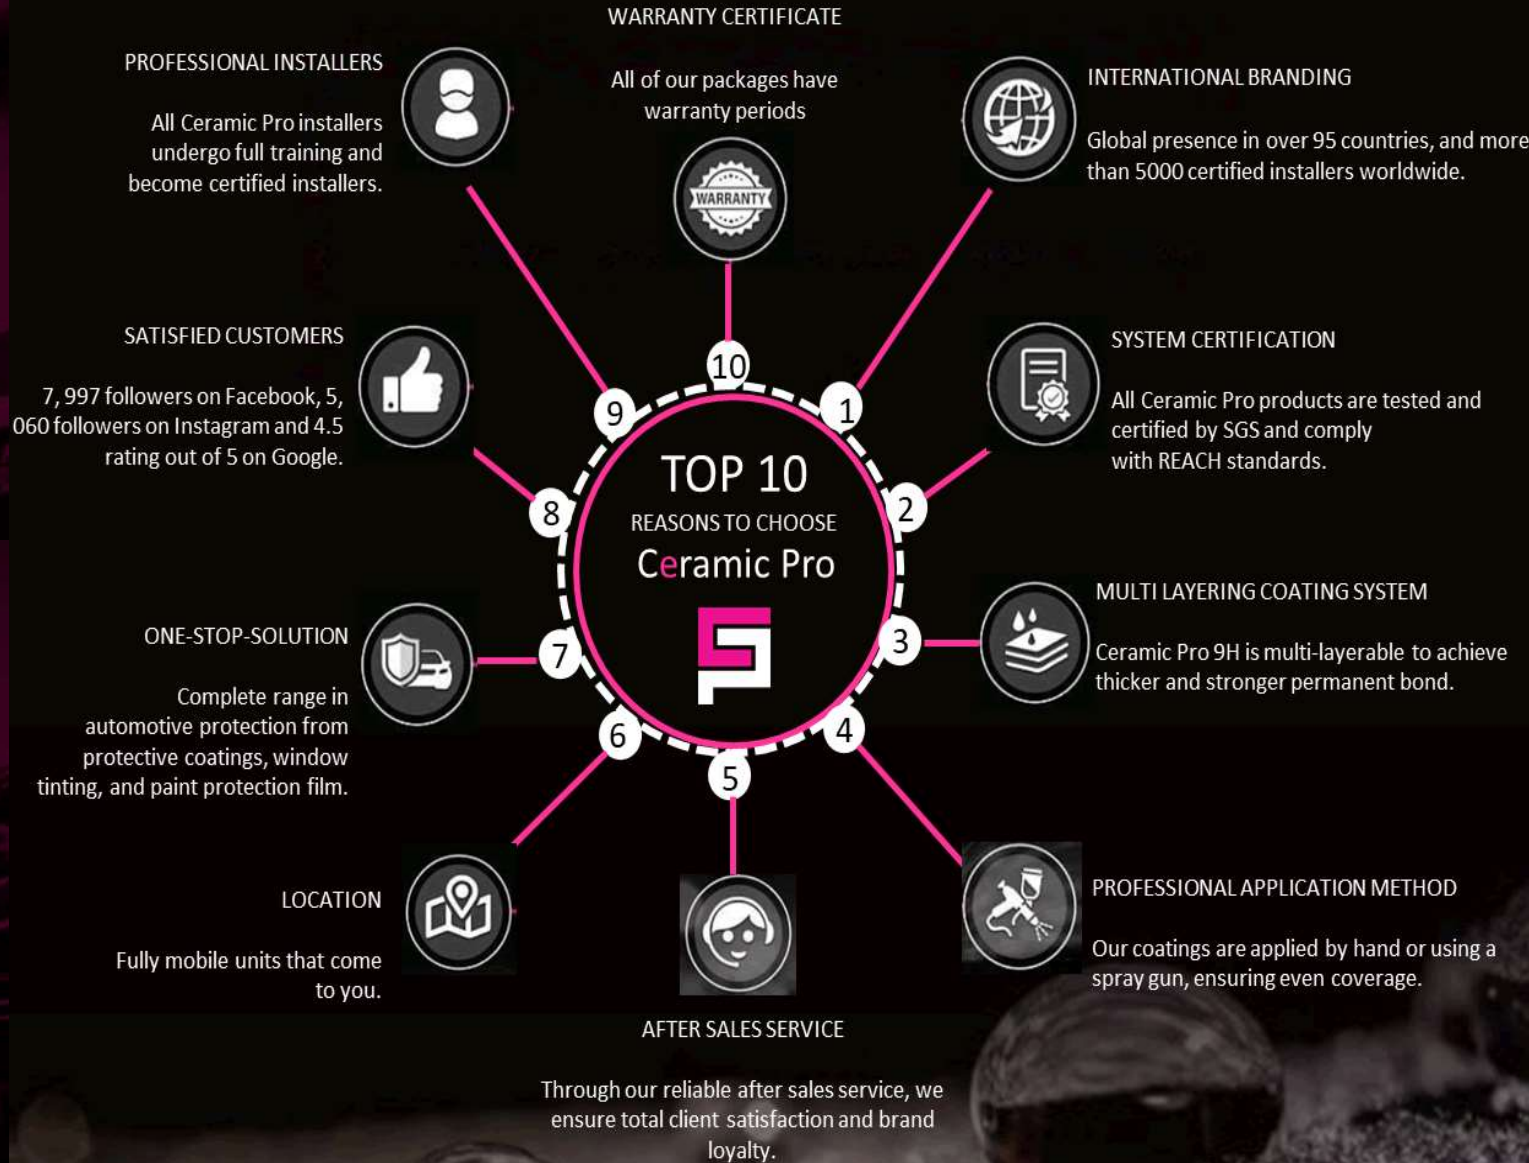

MATERIAL

Introduced in 2010, Ceramic Pro is a series of products for automotive, air and marine markets, for paint, glass, alloy, fabric, leather, plastic and rubber surfaces. Ceramic Pro uses ceramic molecular compounds (nanoceramics). The world patented formula needed a decade of research and testing to become the product it is today. All formulas have Silicon Dioxide, SiO₂. Our new KAVACA PPF benefits from including our flagship ceramic coating out of the box.

CERAMIC PRO[®]

NANOCERAMIC TECHNOLOGY

WHY CERAMIC PRO ON MY VEHICLE?

GOOD INVESTMENT

The coating will protect the vehicle's exterior and interior from deteriorating for a lifetime. The resale market value will therefore be substantially higher! Ceramic Pro pays for itself in the end.

LOOK NEW ALL THE TIME

Once the coating is applied you will see a mirror effect, glossiness and color depth, incomparable to anything else! With proper maintenance your car's finish will shine for many years to come.

LESS MAINTENANCE

The slick coated surface won't allow dirt, brake dust and tar to stick to your paint, wheels or glass. This makes washing your vehicle less labor intensive and less frequent. Waxing is now obsolete.

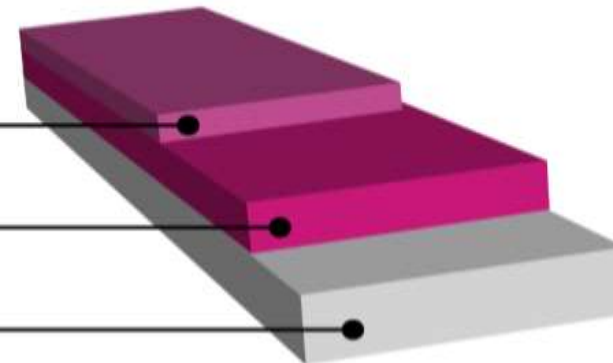

THE CERAMIC PRO SYSTEM

CERAMIC PRO TOP COAT

CERAMIC PRO 9H

PAINT OR VINYL

Ceramic Pro is a Clear, Liquid, Nano Ceramic Coating, which chemically bonds with any surface, forming a Rigid, Nano Glass super – structure protecting the surface. The shielding is permanent, resistant to Solvents, acids, alkalis, UV rays, harsh weather conditions, fire and corrosion. This preserves the original factory paint, makes the surface glossy, Self Cleaning and super hydrophobic. The Ceramic Pro 9H is rated 'above 9H' for its coating ability and is based on advanced Liquid Diamond Technology.

Ceramic Pro is trusted by detailing and car care professionals around the world. And also by ecurie25 in Australia to protect their \$8+ million dollar exotic Super car Collection. Ceramic Pro is the official Paint Protection Partner for Carlsson Cars, tuners for Mercedes-Benz.

All Ceramic Pro products have been tested by SGS, the world's leading inspection, verification and certification entity and have been certified non-toxic. Ceramic Pro achieved the highest possible result in each test.

WHAT DOES KAVACA MEAN?

Kavaca originates from the ancient language Sanskrit. It translates into English as *ARMOR* that ancient warriors from India wore to protect them during battle. The armor gave these brave fighters a competitive advantage in the field, due to its unique design, and the amazing form-fitting features – that securely bonded to the soldier's body.

This *ARMOR* dates back nearly 4,000 years – but the concept of integrating advanced technology to maintain an advantage over the competition holds true today. That's why we chose Kavaca as the brand of our revolutionary ceramic technology infused line of automotive films.

WHY VEHICLE OWNERS LOVE KAVACA AUTOMOTIVE PAINT PROTECTION FILM?

- Helps to protect the vehicle's paint and other materials from road debris – with extreme gloss or a rich matte finish.
- Can be applied as a front bumper package, full front, or entire vehicle clear paint protection film.
- Up to 7 Years Limited Warranty – Highest Among Protective Film
- Superior Scratch Resistance for the Painted Surface, the hood, fender, side view mirrors, headlights, and more.
- Exceptional clarity. Bonds directly to the clear coat of factory paint and helps to reduce swirl marks better than other paint protection films.
- Excellent protection on automotive paint against bug splatter, stone chips, stain resistance, salt, road grime, and ice or snow.
- For added protection, KAVACA Paint Protection Film can be topped with a custom formulated Ceramic Pro 9H Vinyl and PPF nano ceramic coating. The combination of two of the most advanced surface protection products results in an impressive cosmetic effect, improved overall protection of the surface and the ultimate shield of protection.
- You owe it to yourself and your car to choose KAVACA Paint Protection Film. Ask for it by name.

A LEADING COMBINATION OF KAVACA PPF + CERAMIC PRO

Blending two of the most progressive surface protection products results in an extraordinary cosmetic effect & improves the overall protection of the surface, which makes the installation a smooth process. Kavaca Instant-healing is a film which self-heals and can be installed over an existing Ceramic Pro coating. The film is used to improve visual appearance by adding gloss and hydrophobic effect to the surface

OUTSTANDING PPF TECHNOLOGY

Kavaca is a cutting-edge Paint Protection Film, designed and developed by internationally celebrated Ceramic Pro manufacturers NanoShine LTD. The high-performing aliphatic polyurethane film is specifically designed to protect painted surfaces from abrasion, corrosion, chemicals and other physical damage while enhancing the overall visual appearance. The perfect PPF used along with Ceramic Pro coatings was created with years of expertise and research in surface protection. It can be used in combination with Ceramic Pro protective coatings or as a stand-alone product to maximise the performance of surface protection
