Our eye diagnostic tools are top-notch, using the latest technology to give accurate measurements and high-resolution eye images.

Cataract

A cataract is usually an age-related disorder of the eye which leads to clouding of the natural lens of the eye. At CFES we use modern surgical techniques like Phacoemulsification and MICS with premium IOL options

- ◆ Monofocal Lens
- ◆ Bifocal Lens
- ◆ Trifocal Lens
- ◆ Toric Lens

Retina Treatment

We provide specialized treatments for conditions including diabetic retinopathy, retinal vein occlusions, retinal detachment, and age-related macular degeneration treatments, inclusive of surgical interventions.

Glaucoma Treatment

Glaucoma is a condition associated with increased eye pressure and optic nerve damage. This can lead to gradual loss of vision. We provide progressive solutions dedicated to the early detection and treatment of glaucoma.

Cornea Care

The outermost layer of the eye is called cornea. We provide specialized treatment including dry eye treatment including dry eye treatment, pterygium surgeries and corneal tear repair.

Occuloplasty Services

Our occuloplasty services include correcting abnormalities of the eyelids including ptosis correction, entropion, or ectropion. We also address blockage of tear drainage system and squint treatment.

Other Surgeries:

- ◆ Cyst Removal
- ◆ Chalazion
- ◆ Suture Removal
- ◆ Pterygium Excision Surgery
- ◆ Foreign Body Removal
