About Us

◉ Real Variable helps organizations with real time end to end supply chain ecosystem visibility challenges. Our SAAS solution leverage low code platform, blockchain, AI/ML and IIOT tech.

Supply Chain Challenges Impacting Business Operations:

◉ Inefficiencies due to supply chain constraints impacting profit.

◉ Real time Scope 3 Emissions reporting for carbon and other Green House Gases (GHG).

◉ Real time visibility of spare parts for global dealership network.

◉ Increased Warranty Costs for OEM / Tier 1 Enterprise suppliers

◉ Limited Secondary / Tertiary sale visibility impacting revenue growth.

Our SAAS & Platform Solutions

Realcollab

Multitier Supplier Control Tower (Digital Twins – Supplier Parts)

Real time Supplier risks identification & mitigation

Reduce up to **50%** less unplanned factory disruptions due to suppliers.

RealGreen

Forecast, Measure, Report, Validate emissions in real time.

Tracking tool providing industry benchmarks for Co2 and 17 other GHG Parameters.

Approx. **90%** accurate real time Scope 3 emission reporting.
