## ABOUT US

When given a strictly dietary list of the catering and schooling industry, Green Mount has been the industry's standard of quality and value since the 1970s, when an unexciting piece like a galaxy of tins and drawers led to the mass egg spinner boom. It has survived not only the downturn, but also the last two massive upheavings, increasing substantially unchanged.

**OUR LANGUAGE OUR CULTURE**

**VISION**  
Language + Technology

**MISSION**  
Preserving, nurturing and promoting Gujarati language and lexical resources through the use of world-class and contemporary technological tools.

**ABOUT GUJARATILEXICON**

GujaratiLexicon is the first, the largest and the most comprehensive online lexical resource in Indian language. GujaratiLexicon is a landmark in the history of Gujarati language and contains resources of more than 6.5 million words. It is the result of an arduous passion and scientific pursuit of Anup Soni Rishi P. Chhabria, who has spent more than 22 years on this project.

Since its launch in 2004, GujaratiLexicon has grown into the default portal of Gujarati language lovers with more than 400,000 registered users and its growth continues.

**ABOUT BHADRACHANDRAL**

- Cultural heritage of Gujarati language
- Comprehensive, scientific and rich treasure of knowledge
- 2.01 lakh words, 6.22 lakh meanings, 20 years of research, 1000+ pages of etymology database
- Digital Bhadrachandral launched in 12 Congress, 100+ events
- Mobile applications

With its flagship book Bhadrachandral, Mahendra of Gujarat gifted the original Bhadrachandral to the world's largest digital library and website www.gujaratilexicon.com for Gujarati language.

GujaratiLexicon team digitized Bhadrachandral and launched its digital edition in a record time of 11 months. Sushil Chhabria Anup Soni dedicated the project to the world in April 2020.

**Sanatana Dharma, Sanatana Pauran**

Sanatana Dharma, the eternal law, is the foundation of the Hindu religion. It is a way of life that is based on the principles of truth, righteousness, and duty. The word 'Sanatana' means eternal, and 'Dharma' means law or duty. The word 'Pauran' refers to the ancient texts of the Hindu religion, the Vedas. The Vedas are the source of all Hindu knowledge and are considered to be the word of God. The Vedas are divided into four parts: Rig, Yajur, Sama, and Atharva. The Rigveda is the oldest of the four Vedas and is the foundation of the Hindu religion. The Yajurveda is the second oldest and is the basis of the Hindu sacrificial system. The Samaveda is the third oldest and is the basis of the Hindu music and dance. The Atharvaveda is the youngest of the four Vedas and is the basis of the Hindu magic and superstitions.

**Faith is of no strength, Faith and strength, Faith to accomplish any great work.**

**18th Birth Anniversary of Mahatma Gandhi**

On this day in 1869, the world lost a great leader. Mahatma Gandhi was born on October 2, 1869, in Porbandar, Gujarat. He was a political leader, a social reformer, and a non-violent activist. He led the Indian National Congress and the Indian independence movement. He is known for his philosophy of non-violence and his commitment to truth and justice. He is also known for his famous quote, 'Truth Alone Triumphs'. He was awarded the Nobel Peace Prize in 1930 for his work for the Indian independence movement. He is considered one of the most important figures in Indian history.

### Uduppi Diagnostic Market

The Uduppi Diagnostic Market is a rapidly growing market in the Uduppi region. The market is characterized by a high concentration of diagnostic centers and a strong demand for diagnostic services. The market is expected to continue to grow in the coming years, driven by factors such as increasing awareness of diagnostic services and the growing elderly population. The market is also characterized by a high level of competition, with many established diagnostic centers and a number of new entrants. The market is expected to be highly competitive in the future, as more diagnostic centers enter the market and the demand for diagnostic services continues to grow.

potential competition for new diagnostic centres.

Arb Diagnostic is the first choice of the respondents with 44.29% respondents listed it. It is followed by MedicoBee with a score of 43.26% and Dr. Lal Pathlab with 33.02%. Signavitah, which is a national diagnostic chain is not a strong competitor in Udaipur and only 10.7% respondents listed it. The respondents rated bus fares and delays on the basis of cost, service, waiting time and reporting.

To further probe the reason for liking the three main centres of Udaipur, the team at WIZDOM went to the diagnostic centres and collected the data from there. As it was a personal visit by the team, other factors like bus, airfares, airtime, uniform, food and crowd management were not observed.

Here we would like to share some graphical data to show the volume of business for MRI, CT, X-Ray & Sonography to break and measure competition technology wise.

The volume of MRI is good in Udaipur. Though very few diagnostic centres have it but the three main centres Arb Diagnostic, Star Imaging and MedicoBee contribute the maximum. All the three centres have 15 Tesla MRI machines. Star Imaging does the maximum number of MRI with 30-35 MRI per day followed by MedicoBee with 25-28 MRI per day and Arb with 20 MRI per day.

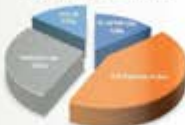

#### MRI BREAK-UP DIAGNOSTIC CENTRE

The volume of CT scans also very high, and the city has good number of CT scan machines. During the pandemic the number of CT scans done was very high and many new machines were also installed by the start-up diagnostic centres. Arb diagnostic does the maximum number of CT scan with 15 CT/day followed by MedicoBee with 10 CT/day and both Dr. Lal Pathlab and Sono Lab does 5

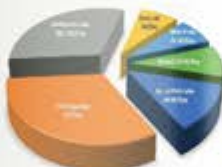

CT/day each. Dr. Lal Pathlab, Arb Diagnostic, MedicoBee and Sono Labs have 15 slice machines.

#### CT SCAN BREAK-UP DIAGNOSTIC CENTRE

X-Ray, which is the most common diagnostic test also has a good potential in Udaipur. Arb diagnostic tops the list in volume with around 25 x-rays per day followed by MedicoBee with 100-120 x-rays per day. Dr. Lal Pathlab with 40-50 x-rays per day. Aravali with 30-35 x-rays per day and Star X-Ray & Sono Lab doing 20-30 x-rays per day each. MedicoBee has two x-ray machines whereas others have one x-ray machine each. Most of the machines are high frequency.

#### X-RAY BREAK-UP DIAGNOSTIC CENTRE

Sonography is done extensively in Udaipur and most of the big diagnostic centres have more than one machine. They have combination of both E. Sonar & Voluson with 67% E Series machines and 33% Voluson machines. Dr. Lal Pathlab and Sono Lab have 2 machines each, whereas Arb Diagnostic & MedicoBee have 3 machines each. Others have one machine each. MedicoBee and Arb Diagnostic go neck to neck with Arb Diagnostic doing 50-75 procedures per day and MedicoBee doing 50-70 procedures per day followed by Dr. Lal Pathlab and Sono Lab where Dr. Lal Pathlab does 30-35 procedures and Sono Lab does 30 procedures per day. Aravali does 25 procedures per day and Star Diagnostic does 15 procedures per day.

as satellite centres of the diagnostic centres helps in increasing the span of reach among the target segment for the diagnostic centres. From the patients and their relative's point of view, it becomes, free convenience as they have a centre in their locality or nearby. Most of the diagnostic centres have 2 testing centres except Arb Diagnostic & Star Imaging which has just 1 testing centre in Udaipur. But when it comes to sample collection centres, MedicoBee tops the list with 240 sample collection centres followed by Dr. Lal Pathlab with 140 sample collection centres and Aravali has 21 and Arb Diagnostic has 2 sample collection centres.

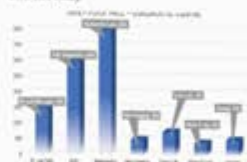

#### NUMBER OF CENTRES

#### SAMPLE COLLECTION CENTRE

The number of satellite centres have a direct impact on the footfall of these diagnostic centres as the graph illustrates vividly.

#### LOADING CAPACITY - DIAGNOSTIC CENTRE

MedicoBee tops the list with the highest footfall of around 500 people per day followed by Arb Diagnostic with 400 and Dr. Lal Pathlab with 300 people per day. The footfall at Star Imaging, Sono Lab, Heen X-Ray and Aravali are between 80 to 100 per day.

High footfall should also get some place to sit in the diagnostic centres. The reason many respondents rated Arb Diagnostic very high is because there they have good capacity for people to sit. The chart above illustrates the sitting capacity of different diagnostic centres of Udaipur.

The footfall at the diagnostic centre directly influences the volume of business and in turn the ROI.
