Our systems come in a range of shapes and sizes, are custom designed to suit the local requirements, fabricated to exact dimensions and fitted-to-suit the particular requirement options.

Be it any design or specification, Prozor Tech has a solution - of style and elegance to meet all expectations.

ENKU 70 SLIDE TT – 2 & 3 TRACK SLIDING DOORS & WINDOWS

The **ENKU 70 Slide TT** system sliding doors and windows solve the demand for a balanced combination of performance, design and functionality. Its "slim" form lets in the daylight so that your rooms, terraces, gardens, and pools remain bright and welcoming. The movement of the sliding element is always easy and light, even when panels are very heavy.

The **ENCRAFT EKU Pe 70 Slide TT series** can make medium-sized sliding doors and windows with two, three, or four panels. Some of the advantages are that it provides good thermal insulation, reduces noise upto 39 dB.

ENKU 53 series system window systems are ideal for windows and French windows with or without roller shutters, external doors, fixed glazing and glazing for industrial and manufacturing use or for public and private constructions, in climate zones where conditions are harsh. They are energy-efficient and a great energy saver. They are robust, durable, and weather-resistant.

They come with excellent air and water tightness. They provide a good level of noise reduction (Upto 39 dB).

ENKU 53 SERIES – FRENCH CASEMENT WINDOWS

ENKU PERFECTION SLIDE

ENKU PERFECTION SLIDE is the new sliding system with a slender design that compliments the Aluminium range. The minimal aesthetics (central node of only 20 mm) are accompanied by innovative technical solutions. The system comes with a thermal break and non-thermal break; the glazing has seals and partial structural seals and the angles are aligned at 45 degrees.

The reduced area of the profiles, the greater glazed surface, the possibility of installing double-glazing, and the development of higher quality insulating materials have enabled the **ENCRAFT EKU Aluminium SLIDE** windows to perform best in terms of thermal transmittance (UW) & light transmission. These sliding doors can reduce sound upto 47 dB.
