

**PINCH BAG
CLOSER
PBC-02**

Mark Enterprise

Mfg. & Exp. of Pinch Bag Closer Machine

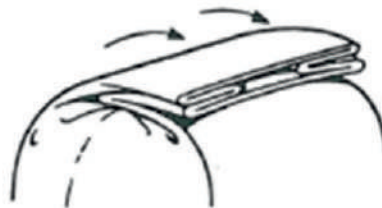

Email: info@markgrp.com

Operating Reliability

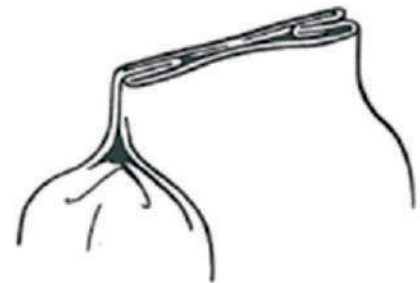

- .The Pinch Bag sealing unit offers maximum reliability, flexibility, and industrial safety
- .The bags are directed through the process in a controlled manner, ensuring a high level of dependability
- .The machine can be quickly adjusted to suit different bag sizes and products without requiring any tools
- .The machine also includes a swing-out lid, which allows quick and easy access for cleaning and maintenance during bag jams

Registration : Applied for Patent

Machine specification

Recommended Bag	:	PBOM (Pinch-Bottom, Pinch Cut[Step Cut] Open Mouth)
Seal Style	:	PBOM- Thermo Seal
Pinch Fold	:	Single Fold
Speed Range	:	14-16 bags/min
Feed Direction (Standard)	:	Right to Left (standard) [left to right on demand]
Bag Orientation	:	Vertical
Sealing Height (Adjustable)	:	400 mm to 1000 mm (16" to 40")
Air Requirement	:	Compressed Air @ 6 Bar Pressure @ 40 CFM
Foot Print (LxWxH)	:	107 in (2700 mm)x61 in (1550 mm)x83 in (2100mm)
Electric Power Requirement	:	440 Volt ,50 Hz Three Phase

Features and Benefits

- Digitally controlled for quick production start up
- Easily connected with existing bag line
- User-friendly operating
- No adhesive or any kind of glue required for sealing.
- Motorized adjustable seal height to reduce change-over time
- Recipe recall for future reference

Bag Specifications & Benefits

Benefits to Customer

- Six sided branding possibility
- No water and moisture permeability
- Perfect Shelf Presentation of the product
- Light weight and eye Catching
- Increased strength

Benefits to Packers & Mfg.

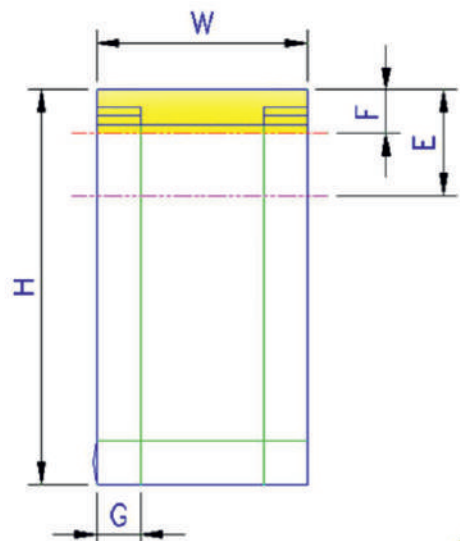

- Low cost production and minimum wastage
- Excellent shelf display
- Reliable protection of content & Increased Strength
- Sustainable, Fully Recyclable & Environment Friendly bag
- No duplication possible
- Super strong up to 100 lbs
- Light weight
- Suitable for auto filling system

Benefits to Logistic & Warehouse

- Easy logistic ←
- No leakage and no humidity impact ←
- Same volume in Each Bag ←
- Proper palletizing and stacking of the Bag ←

Bag Specification

		Min. (mm)	Max. (mm)
Bag Width*	W	250	480
Bag Length*	H	500	1070
Side Gusset*	G	50	200
Folding Line*	F	50	100
Empty Bag From Top*	E	150mm + Pinch Volume	
Filling Volume		2.5 kg to 50kg	

- * Depends upon bag/gusset & filling volume
- * Depends upon bag size & filling volume
- * Folding line direction towards operator side
- * Top bottom and side gusset size is same
