**Manufacturer of : SIDDHI BRAND Stone Jaw Crusher,  
Screen & Spare Parts,  
Deal in : Road Construction Machineries & Spares  
(Asphalt Batch Mix|Hot-Mix|Wet-Mix & Asphalt Paver)**

## About Us

Established in the year 2011, we "**S.D. Industries**" a leading organization of the industry involved in manufacturing, supplying and trading a broad collection of Construction Machines and Spare Parts. Product collection offered by us consists of Crusher Spares, Hot Mix Plant Spares and Vibratory Roller Compactor Spares. Offered products are designed in tune with the set industry parameters by using optimum quality input factors that are given by the reliable and trusted resources of the market. Our offered product-array is highly acclaimed by the customers for their accurate dimensions, flawless finish and optimum quality. To meet the modern needs of our valued patrons, we are manufacturing these products in many specifications. Also, these offered products are used in construction industry.

Our firm is able to fulfill the bulk needs of the offered products. It is possible because of our highly efficient and advanced infrastructure facility. Our infrastructure facility is equipped with the latest machines and tools required for the manufacturing of the offered products. To running all our business process, we have hired a team of talented professionals. Our team is having experience and deep knowledge of this field and design the products as per the latest market trends.

Under the assistance of our well-qualified mentor Mr. Ramoj Tiwari, we have been able to carve a dynamic position in this domain. Because of his assistance, we have been able to enter a huge number of clients in our client base.

## Jaw Crusher

Our enterprise has gained immense recognition in providing a quality assured assortment of Jaw Crusher. The provided crusher is best suited for crushing rocks and stones for construction purposes. This crusher is manufactured with optimum precision using the finest grade components in sync with predefined industry norms. Furthermore, this crusher can be bought by the patrons at a very reasonable rate.

### Features:

- Rugged design
- High tensile strength
- Precise dimension

## Stone Crusher

Leveraging on our vast industry experience, we are offering a wide collection of Stone Crusher. Under the supervision of diligent technocrats, offered crusher is manufactured by making use of quality approved components. The provided crusher is used for crushing stone for construction purposes. Available in various dimensions, this crusher can be availed from us at marginal rates.

### Features:

- Robustness
- Noiseless operation
- High endurance

## Vibro Feeder With Steel Hopper

We are recognized as the prominent firms, engrossed in providing of a wide array of Vibro Feeder With Steel Hopper. Available in various technical specifications, this hopper is manufactured with great precision using the best quality components under the proper guidance of our agile professionals. This hopper finds wide application at construction sites for mixing concrete and other materials. Besides, our valued clients can get this hopper at nominal prices.

### Features:

- Compact design
- Dimensional accuracy
- High operational fluency

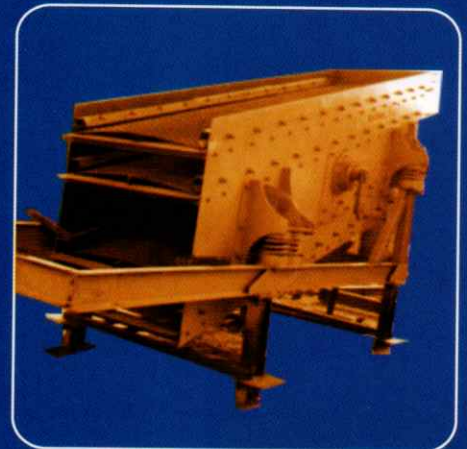

## Vibrating Screen

Backed by our affluent industrial experience in this domain, we are committed towards offering wide array of Vibrating Screen. The offered product is designed under the guidance of our dexterous professionals using utmost quality components with the help of innovative techniques in compliance with the defined industry standards. Apart from this, the provided product passes through several tests in order to ensure its high performance. The provided product is made available in technically specifications at reasonable prices.

### Features:

- Impeccable performance
- Sturdiness
- Minimum maintenance

## Bitumen Sprayer

We are instrumental in providing our clients a comprehensive range of Bitumen Sprayer. This sprayer is designed making use of optimum quality components and ultra-modern technology under the supervision of our experienced professionals as per predefined industry standards and norms. Prior to deliver at our clients' end, this sprayer is thoroughly tested on predefined quality parameters for ensuring its flawless performance.

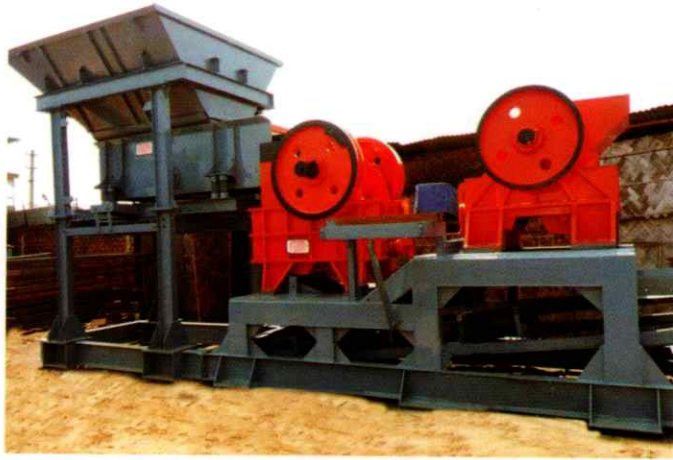

### Features:

- Perfect functionality
- Easy to operate
- Low maintenance

Capacity: 4000 Liters, 6000 Liters, 8000 Liters and above.

**Nomad Crusher Plant**

**25tph Nomad Jaw Crusher Plant**

**Automatic Crusher Plant**

**Vibrating Feeder**

**Crusher Spares**

### DRUM MIXING PLANT CAPACITY 20 TO 120 TPH

**Specification :**

The 20 to 120 TPH Plants are supplied with a low maintenance cost. The auto lubrication system ensures proper and adequate lubrication. Thereby ensuring long years of trouble free machine service.

### RUBBER CONVEYOR BELT

Supplier of genuine spare parts for all types of Hot Mix Plant, Wet Mix Plant, Paver Machines & Crusher Machines.

### ASPHALT PAVER FINISHER

**Specification :**

Asphalt Paver finisher machines are made under strict quality checks and are highly durable and reliable. Not only this, our asphalt paver finisher machine can be available at reasonable prices as well.

### WET MIX MACADAM PLANT

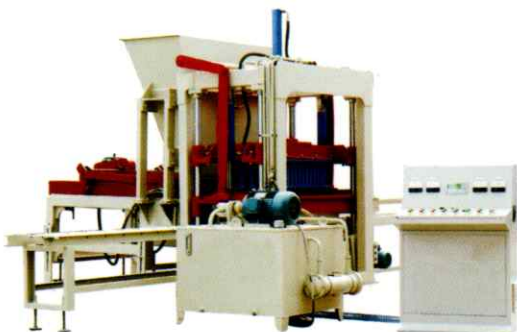

**Specifications :**

The WMM Series plants are fully equipped to deliver cold mix, cement/lime treated aggregate base course mixes, etc. Quality & specific steel construction along with high quality bough out components ensure maximum reliability and uptime. The WMM series offers customers the finest & proven technical solution, latest generation process controls and automation and site support, aimed to deliver price mix-productively and profitably. Complete range of mode is available with rated Capacity is 60-250TPH.

### ASPHALT BATCH MIX PLANT (Capacity starting from 120 TPH)

**Specifications :**

Asphalt batch mix plant is an ideal construction equipment used for manufacturing of asphalt that is mainly used for road construction. Asphalt is prepared by mixing appropriate proportion of aggregates, sand and stone dust, heated and then appropriate promotion of bitumen and then it is transported to work site.

### FLY ASH BRICKS MAKING MACHINE

**Specifications :**

An automatic Fly Ash brick making machine for normally and specially designed Fly Ash Brick Manufacturers to short out from the all technical phenomena's for production based and quality comparison other than international quality machinery.
