RO-RO is an innovative means of establishing a synergistic relationship between the railways and the roadways instead of being competitors. The service has helped the railways to get back the piecemeal traffic that had got diverted to the road sector. The service benefits the truck owners as well as the railways while saving precious diesel for the country. It saves wear and tear on tires, reduces the maintenance cost of trucks, enables faster turn-round of trucks, faster delivery of goods, gives higher profits, less pollution, and better road safety.
